

After you have download the "*Isac Images Actions.zip*" file/s, extract and save the files into a folder on your hard drive.

Displaying the ACTIONS PALETTE:

If your Actions Palette is not visible, press **ALT+F9** to open it *or* open it via the top menu as shown below.

Method 1: (Easiest)

If Photoshop is not running, this method will run Photoshop automatically and put selected actions into your actions palette.

Single Action: Find the ".ATN" file in your file browser and **double click** on it. If Photoshop is not running, this will start Photoshop and automatically place the action into your actions palette. If Photoshop is already running, your new action will appear in your Action Palette.

Multiple Actions: Find the ".ATN" files in your file browser and select your actions. Once selected, press "**Enter**".

You can also DRAG & DROP your selected action files onto your Photoshop workspace.

Method 2: (Manually load actions from within Photoshop)

Make sure your Action Palette is visible.

(see "**Displaying the ACTIONS PALETTE:**" above)

1. On the top of the Actions Palette, click on the fly-out menu button.
2. When the options are displayed, click on "**Load Actions ...**".
3. Navigate to where your action file is located.
4. Select the action you want to load and press "**Load**".
5. The action should now be displayed in your Actions Palette.

Have fun playing with your Isac Images FREE Photoshop ACTIONS.
